Landing Page Design | Landing Page Development | Website Design | WordPress | Elementor | Shopify | GoHighLevel | Sales Funnels | CRM Setup | Lead Capture Systems | Workflow Automation | Form Setup | Email Integrations | Basic SEO | Responsive Web Design | UX/UI Design | Website QA | Figma | HTML/CSS | Javascript | Client Communication

PROFESSIONAL EXPERIENCE

LANDING PAGE DEVELOPER / AUTOMATION SPECIALIST

Cherrington Media | April 2023 – April 2026

- Designed and optimized responsive WordPress landing pages and sales funnel pages to improve website credibility, mobile experience, and lead capture flow.
- Built and updated Shopify product pages with cleaner layouts, stronger product visuals, and conversion focused sections to support eCommerce sales.
- Created GoHighLevel funnels, lead capture pages, and inquiry workflows to help clients organize leads and support faster follow-ups.
- Improved website performance by optimizing plugins, images, videos, fonts, and media assets across WordPress and Shopify websites.
- Integrated forms, email tools, payment systems, logistics platforms, and tracking tools including PayMongo, Xendit, Parcel Panel, Cloudflare, SendGrid, and Google Analytics.
- Managed website QA across desktop and mobile to test responsiveness, form functionality, layout consistency, and overall customer journey before launch.

LANDING PAGE DEVELOPER / AUTOMATION SPECIALIST

Nest Marketing | 2022 – 2023

- Designed high fidelity website and landing page layouts in Figma and Sketch to support client marketing campaigns, website builds, and conversion focused page structures.
- Built responsive websites from approved designs, ensuring accurate layout execution, clean visual presentation, consistent branding, and smooth mobile usability.
- Developed and maintained WordPress websites while applying basic on page SEO improvements to support clearer page structure, better content organization, and search readiness.
- Optimized images, media assets, and page elements to improve loading speed, user experience, and overall website performance.
- Set up Google Analytics and tracking tools to help monitor website traffic, user behavior, and campaign performance.
- Configured Zapier automation workflows to connect tools, reduce repetitive manual tasks, and improve backend process efficiency.
